

## Climate Graphs

These are combination bar and line graphs showing the average temperature and rainfall of a place for each month of the year.

**When describing / summarising a climate graph, consider the following:**

1. Does temperature and rainfall vary throughout the year?
2. What is the maximum and minimum temperature and when?
3. What is the temperature range? (Difference between min and max temp.)
4. When is most and least rainfall? (wet and dry season)
5. What is the average temperature?
6. What is the total annual rainfall?
