Instructions for completing your survey and poster

Calculate your gender ratio.

Total the number of crosses in each column and put that number in the bottom row.
Add the column totals together. For example if you have answered **every question** then the sum of all the columns will be 12.

How to calculate your ratio:

$$\frac{\text{Female column total} \times 100}{\text{sum total}} : \frac{\text{Male column total} \times 100}{\text{sum total}}$$

So for example, if you answered all the questions and recorded 2 females and 10 males in your survey, your calculation would be:

$$\frac{2}{12} \times 100 : \frac{10}{12} \times 100$$

$$= \quad 16.66 : 83.33$$

$$= \quad \mathbf{17 : 83}$$

Now express your ratio like this %females : %males e.g. 50 : 50 or 17 : 83
The sum of the two sides of your ratio should equal 100 and remember to put the female figure on the left, the male figure on the right.
