

EDIT

Edit the 'WABOLL'

Circle spelling errors and label with 'sp',
Circle punctuation or capital letter errors,
Wobbly underline for poorly written sentences

REWRITE

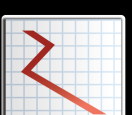

Write out the 'WABOLL' correctly

Reminders: Capital letters at the start of sentences,
geographical key terms and link the adaptations to the
conditions in the rainforest. Use because and this means that.

IMPROVE

Improve and develop the piece further

Key Ideas: waxy layer, drip tip, buttress roots, humidity,
rainfall, thin and smooth bark, lianas, sunlight, photosynthesis
and flexible leaf stems.

The plants in the tropical rainforest
have many adaptations to help them
survive. Figure 1 shows plants with a
drip tip and waxy leaves. The trees
also have a thin layer and are smooth.
The trees also have strong roots called
buttress roots.

Level 1 (basic) 1-2 marks

- ✓ You demonstrate limited knowledge of vegetation and climate in rainforest areas.
- ✓ You make limited use of the photograph.

Level 2 (clear) 3-4 marks

- ✓ You demonstrate accurate knowledge of the features of vegetation and climate to support the explanation.
- ✓ You make clear and effective use of the photograph.

Level 3 (detailed) 5-6 marks

- ✓ You apply detailed knowledge of rainforest vegetation to interpret the features identified.
- ✓ You clearly relate characteristics shown in the photograph to the climate of the tropical rainforest environment.
