The role of markets in allocating resources

- 1 Changes in non-price factors that affect demand or supply will cause a change in the
 - A equilibrium price only.
 - C quantity traded only.
 - B equilibrium price and quantity traded.
 - D tax rate.
- 2 The impact of the imposition of a sales tax for a product is likely to lead to
 - A a higher level of quantity demanded and a lower price.
 - B a higher price and lower level of quantity demanded.
 - C both a higher price and higher level of quantity demanded.
 - D both a lower price and lower level of quantity demanded.
- 3 Which is **not** a supply factor that causes a change in the equilibrium price of a product?
 - A price changes
 - C spare capacity
 - B sales taxes
 - D subsidies
- 4 Which is a consequence of lower demand for a particular product?
 - A Equilibrium quantity falls and the price falls.
 - C Equilibrium quantity rises and the price falls.
 - B Equilibrium quantity falls and the price rises.
 - D Equilibrium quantity rises and the price rises.
- 5 Which will cause a rightwards shift of the demand curve?
 - A higher production costs
 - C lower sales taxes
 - B lower income taxes
 - D subsidies provided to producers
- 6 State **two** factors that can shift the demand curve for a good or service. [2 marks]
